Notes

Atlantic Coal plc is an AIM listed coal production and processing company focussed predominantly on open cast mining and the processing of

anthracite coal in Pennsylvania, USA. The Company's primary asset is the Stockton Colliery, a producing surface coal mine and adjacent anthracite preparation plant encompassing an area of approximately 900 hectares located in Hazel Creek in North-East Pennsylvania, which has current Proven Reserves of 4.2 million tons run-of-mine coal.

Atlantic's strategy is to create a significant mid-tier coal company; both through the expansion of activities at Stockton and identifying additional sites in Pennsylvania to build its production and resource profile, primarily by acquiring defined assets in stable, recognised, high quality coal regions. The Board has identified opportunities to expand within the region and is involved in ongoing negotiations regarding adjacent sites, with the intention of acting as a regional consolidator in the Pennsylvanian Coal Field. Expansion within the local area has the potential to minimise upfront deal costs as a result of existing and proven infrastructure, equipment, facilities and market demand.
